FOREWARD

This report presents a Historical Summary of the Capital Improvements authorized by the General Assembly 1964-1978 and funded under General Obligation Bond Authority or as a Capital Appropriation in the annual State Operating Budget.

If information is desired on capital improvement projects authorized prior to 1964, reference should be made to Department of State Planning Publication No. 158 entitled "Capital Improvements Authorized by General Assembly 1955 through 1969", dated October 1969.

COMMENTARY

The Department of State Planning under its basic legislative authority, acts as the Governor's principle staff agency in planning matters concerning the resources and development of the State. Included in its mandated responsibilities are: (1) prepare the State's capital program and the annual capital budget, as well as study all capital projects prepared to be undertaken by State departments and agencies, and (2) prepare amend and keep up to date a five-year program of State public works and major capital improvement projects undertaken or recommended to be undertaken by the State. Both of these responsibilities are performed each year and documented for presentation to the General Assembly at the beginning of each session.

In addition, the Department of State Planning prepares annually a historical summary of those capital improvement projects authorized by the General Assembly and funded under General Obligation Bond Authority or as a Capital Appropriation in the annual State Operating Budget. The historical summary does not include those capital projects of the Department of Transportation supported by the Consolidated Transportation Bond Program or those supported by other Revenue Bond authority.

Prior to this year, the annual Capital Improvement Program, The Five-Year Capital Needs Program and the Historical Summary have been published and distributed as a single document just prior to the next session of the General Assembly. In order to provide updated information on previously authorized and funded capital improvement projects in a more timely manner, beginning in 1978, the Historical Summary will be published and distributed as soon as possible after the beginning of the current Fiscal Year. For ease of cross reference, the recipient State Agencies will be listed in the Historical Summary in the same order of sequence that they appear in the Annual Operating Budget. The Annual Capital Improvement Program and the Five-Year Capital Needs Program, including the legal requirements and directives, will continue to be published and distributed just prior to the General Assembly session.
